

William's Residence
Telluride, Colorado
Current

Owner: The Williams
 Architect: Centre Sky Architecture
 EOR: Russel A. Martino

Large Custom Home on Complex Sloping Site

Land in Telluride is scarce, expensive, and generally steep. The owner and architect needed a layout that could utilize a minimal footprint while maximizing the square footage of the residence. This required a completely different layout from one floor to the next while also requiring the utilization of the complete site even though it sloped 25'-0" from one end of the house to the other.

Cluster Details

To clearly define complicated exposed structures and systems, Martino & Luth, Inc. utilized a "piece" scheme known as a cluster detail. In this method, complex systems such as the circular ante room or the stone fireplace can be drawn and detailed in plan and elevations all on one sheet to clearly define all aspects of the construction.
